Power BI Step-by-Step Build Guide

1. Open Power BI Desktop

- Launch Power BI Desktop

- Load the cleaned file: data/cleaned_output.xlsx

2. Add KPI Cards

- Card 1: Drag MRN to visual, set to 'Count', rename 'Total Patients'

- Card 2: Add Draw_Overdue field, apply filter for 'Overdue', count rows, label 'Patients Overdue'

- Card 3: Filter Draw_Status_Category for 'Compliant', count rows, label 'Compliant Patients'

3. Add a Stacked Bar Chart

- Axis: Last_Timepoint

- Values: Count of MRN

- Legend: Draw_Status_Category

4. Add a Table Visual

- Add fields: MRN, Patient_Name, Diagnosis, Expected_Draw_Date,
  Draw_Status_Category, Draw_Overdue

5. Optional: Timeline or Gantt Visual

- Use a custom visual to show treatment/draw events over time per patient

6. Save and Publish

- Save as: Signatera_Tracker.pbix

- Publish using Power BI Service
